### Languages & Runtime

JavaScript (ES6+)

TypeScript

Node.js

### Frameworks

Vue 3 / Nuxt 3

Angular

Express/Fastify

### Backend & API

REST API (Node/TS)

GraphQL

Firebase / Auth0

### Databases

Firebase

MongoDB

SQL

## Professional summary

Freelance Senior Web Engineer specialized in Vue 3, Nuxt 3 and Node.js.

8+ years of experience building high-traffic web applications, Node/TypeScript APIs, GraphQL integrations and automated testing (Vitest, Playwright).

Expert in refactoring, performance optimization, TDD, i18n and A11y, contributing to complex and international projects (Accor, SaaS platforms).

## Professional experience

### Accor — Senior Front-end Engineer (Freelance)

sept. 2023 – dec. 2025 (30 months)

Tech : Vue 3, Nuxt 3, TypeScript, GraphQL, Playwright, Vitest

- Migration from Vue 2 to Vue 3 / Nuxt 3 for the reservation flow.
- Integration and contribution to the design system.
- Implemented a complete testing strategy (Vitest, Playwright) and CI automation.
- Close collaboration with product and QA teams in an international environment.
- Built a Back-for-Front layer for data orchestration.
- Advanced GraphQL integration, state management, caching, hybrid SSR/CSR.

### Mon Commerce Interactif (MCI) — Full-stack Engineer

april 2023 – sept. 2023 (6 months)

Tech : Nuxt 3, Vue 3, Flutter, Firebase Auth & Firestore, Cloud Storage

- Developed a Flutter mobile app for merchants and customers (QR code onboarding, multi-profile management).
- Built the dashboard and website in Nuxt 3 (menu management, wines, customers, uploads, agents).
- Front/back architecture, query optimization, data structuring, refactoring and CI.
- Versioning, beta testing and user feedback integration.

### Gritchen — Full-stack Engineer Vue 3 (Freelance)

jan. 2023 – jun. 2023 (6 months)

Tech : Vue 3, Pinia, TypeScript, Laravel, REST API

- Developed Vue 3 interfaces for an insurance platform (dashboards, complex forms, customer area).
- Front-end integration with a Laravel API (auth, contracts, claims management).
- Collaboration with product teams to enhance business features.

## Testing

Vitest

Jest

Playwright

TDD

## Tools

Git / GitLab

Docker

CI/CD

Netlify / Vercel

Firebase Hosting

Web Accessibility (A11y)

i18n (vue-i18n)

## Languages

French — Native

English — Fluent (B2/C1)

# Additional experience

## Place2Be — Full-Stack Engineer (Freelance)

sept. 2022 – dec. 2022 (6 months)

**Tech : Flutter, Nuxt 3, Node.js, Fastify, TS, MongoDB**

- Developed a Flutter mobile app for local event management.
- Built the Nuxt 3 admin front-end (content, users, interactions, ads purchase).
- Designed and implemented a Node.js/TS backend with MongoDB (models, REST API, validation, security).
- Product + UI/UX collaboration, technical workflow organization, refactoring & performance.

## NEUVA — Technical Project Manager & Web Developer

jun. 2021 – sept. 2022 (15 mois)

**Tech : Node.js, Fastify, TS, MongoDB, Flutter, Angular**

- Technical leadership and project management (SCRUM).
- Development of Flutter/Node/Mongo applications for geolocation and customer services.
- API architecture, specifications, refactoring and industrialization.

## Cactus Pharma — Web & Mobile Developer

jan. 2021 – jun. 2021 (6 mois)

**Tech : Angular, Electron, Flutter/Dart, Firebase, sqlite**

- Developed an Angular/Electron desktop application for medication serialization.
- Built a Flutter mobile app for customer loyalty using receipt scanning.

## Streamaker — Ingénieur Full-stack

Sept. 2020 – Dec. 2020 (6 month)

**Tech : Vue 2, Vuex, Node.js, Express, PayPal & Stripe API**

- Fully developed a Vue.js e-commerce platform (frontend + backend)
- Implemented the monetization system: payments, subscriptions, PayPal integration
- Built a dynamic contract-generation workflow (automated creation & validation)
- Contributed to the architecture, API design, and secure payment flows

# Education & Certifications

- RNCP Level 5 – Web & Mobile Developer – 2021
- Vocational Baccalaureate in Sales & Customer Relations (NRC) – 2005
