SKILLS

Languages & Frameworks

JavaScript (ES6+), TypeScript,
Node.js, Vue 3 / Nuxt 3, React / React
Native, Angular, Flutter / Dart, PHP

Backend, API & Data

Node.js (NestJS, Express, Fastify),
Laravel, REST API, GraphQL, Apollo,
BFF, microservices, Firebase /
Firestore, MongoDB, SQL, Auth0

AI / LLM Integration

OpenAI API, Prompt Engineering,
RAG / embeddings, Python
microservices

Testing & DevOps

Vitest, Jest, Playwright, TDD, Git,
GitLab, Docker, CI/CD, Vercel, Netlify,
EAS

Quality & Design

Web Accessibility (a11y,
WCAG/RGAA), i18n (vue-i18n),
Storybook, Design System

EDUCATION

RNCP Level 5

Web & Mobile Developer · 2021

Bac Pro NRC

2005

LANGUAGES

French — Native
English — Fluent (B2/C1)

OPEN SOURCE

trimly

TypeScript/Node CLI for tracking
token consumption (Claude Code).
@trimly/core & @trimly/cli on npm ·
Apache-2.0

Professional Summary

Fullstack Node.js / Vue.js Developer — 8 years of experience. Coming off a 30-month mission at Accor (Convert team, 12 people, 17 languages/countries) on the rebuild of the booking funnel: Vue 2 → Vue 3 / Nuxt 3, dedicated Node.js BFF, GraphQL, design system, SSR/CSR, Vitest + Playwright in CI. Technical referent on front-end architecture and code quality — autonomous and proactive in a demanding large-enterprise environment.

Versatile fullstack profile: front Vue/Nuxt + React/React Native + Flutter, back Node.js (Express, Fastify, microservices) and Laravel. Experience leading multi-stack projects. I operate as a freelancer through Joys Lab (SASU), with several SaaS in production and an OSS tool published on npm.

Before tech, 15 years in field sales — Century 21, VRP I@D, digital sector manager at Leboncoin (Agriaffaires & MachineryZone). A rare blend of senior developer + business sense in tech.

Professional Experience

Joys Lab — SASU · Founder & Lead Developer

2024 – present · Freelance development studio

Active

Tech: Nuxt 3, Next.js, React Native / Expo, Node.js / NestJS, Firebase, OpenAI API, RAG / embeddings

- My Liste Chaude — React Native / Expo app (Firebase Auth/Firestore, geoloc, deep linking, CSV/Excel import, XP/level gamification), full EAS pipeline
- Forenlyst — deepfake detection + forensic certification (Next.js front, NestJS + Python microservices back, crypto signature)
- SaaS in production: mikaelw.com (portfolio + assistant IA), OSS-Nation (BJJ platform + AI analysis) — Nuxt 3, OpenAI API, SSR, i18n
- trimly — OSS tool published on npm (TypeScript/Node, Apache-2.0)
- OpenAI API in production since 2024 (RAG, embeddings, prompt engineering)

Accor — all.accor.com — Senior Fullstack Engineer

Sept. 2023 – Dec. 2025 · 30 months · Convert team (12 people) · 17 languages/countries

Long mission — on-site

Tech: Vue 3, Nuxt 3, Node.js, TypeScript, GraphQL, Playwright, Vitest

- Vue 2 → Vue 3 / Nuxt 3 rebuild of the booking funnel
- Built a dedicated Node.js BFF for the funnel
- Advanced GraphQL integration: caching, fragments, hybrid SSR/CSR
- Active integration and contribution to the design system
- Testing strategy (Vitest + Playwright) and CI automation
- Direct collaboration with product, QA, design — international environment
- Technical referent on front-end architecture and code quality

Mon Commerce Interactif (MCI) — Full-Stack Engineer

Apr. 2023 — Sept. 2023 · 6 months

Fixed-price project — MVP

Tech: Vue 3 / Nuxt 3, Flutter, Firebase (Auth, Firestore, Cloud Storage)

- Vue / Nuxt 3 admin dashboard (menus, wines, clients, uploads, agents)
- Flutter mobile app (iOS + Android): QR-code onboarding, multi-profile management
- Firebase architecture: Auth, Firestore, Cloud Storage, security rules
- Refactoring, industrialization, CI

Gritchen — Full-Stack Engineer

Jan. 2023 — June 2023 · 6 months

Fixed-price project — MVP

Tech: Vue 3, Pinia, TypeScript, Laravel, Node.js microservices / Fastify

- Insurtech platform — business dashboards (contracts, claims, client area)
- Typed Vue 3 / Pinia front, complex multi-step forms
- Laravel back + Node.js / Fastify microservices
- Pinia state architecture and API integration

Chasse en Cours — Mobile app (personal product)

2023 · Published on the App Store

Personal product

Tech: Flutter / Dart, geolocation, real-time map

- Community app for reporting hunts (hunters / walkers), France-wide coverage
- Geolocation, activity declaration and real-time map display
- End-to-end design, development and App Store publishing

Place2Be — Mobile & Backend Engineer

Sept. 2022 — Dec. 2022 · 4 months

Fixed-price project — POC

Tech: Flutter (front), TypeScript / Node.js (back), MongoDB, DataTourisme

- Flutter mobile app: displaying events around the user (geoloc)
- Ingestion and management of 300,000 events from the DataTourisme API
- TypeScript / Node.js backend, API architecture and security

NEUVA — Tech Lead

June 2021 — Sept. 2022 · 15 months

Long mission — on-site

Tech: Vue, Nuxt, React, PHP / Laravel, Node.js, Flutter

- Tech lead on a varied portfolio of projects (web & mobile)
- Multi-stack technical leadership: Vue / Nuxt, React, PHP / Laravel, Node.js, Flutter
- SCRUM method, architecture, technical specs, refactoring and industrialization

Cactus Pharma — Web & Mobile Developer

Jan. 2021 — June 2021 · 6 months

Fixed-price project — MVP

Tech: Angular, Electron, Flutter / Dart, Firebase, SQLite

- Angular / Electron desktop app for drug serialization
- Flutter mobile app for customer loyalty (receipt reading + OCR)

Streamaker — Full-Stack Engineer

Sept. 2020 — Dec. 2020 · 4 months

Fixed-price project — MVP

Tech: Vue 2, Node.js, Express

- E-commerce platform for rap beats (buying instrumentals, recording vocals)
- Vue 2 front: catalogue, purchase flow, subscriber area
- Node.js / Express back: REST API, user management, security
- Monetization and subscription system
